Spices

About Spices

- Spices are one of the most important ingredients in Indian dishes. Indian Spices have been popular across the world for their unique flavor, aroma, and beautiful texture.
- India has been a front-runner in the race for export of spices. India leads in the production and their exports of different spices and products in the last few years have shown an increasing trend.
- Out of the 109 varieties listed by the International Organization for Standardization around 75 varieties are exported and produced by India and therefore India is known to be the "home of spices".
- Spices are aromatic substances of vegetable origin obtained from various roots, bark, leaves, and stems of certain plants.
- They have a varied range of properties and cater to the cosmetic, perfumery, medicinal and food industries.
- In the medicinal sector, they act as antioxidants, antimicrobial agents. To the perfumery industry, the processed products of spices like oleoresins and spice oils play an important role.
- Spices are valued mainly for their distinctive color, flavors and aroma and thus are indispensable for culinary purposes and flavoring.
- Spices come with notable nutritional values and provide some major health benefits.
- we believe that Indian culture and our unique spices in India should reach each corner of the world.

Cumin Seeds & Powder

Our cumin seeds and ground cumin are rich in aroma and flavour. Widely used in food processing, spice blends, and traditional recipes.

Fennel Seeds

Naturally sweet and aromatic, fennel seeds are used in culinary, beverages, and digestive products.

Turmeric Powder

Known for its rich golden colour and curcumin content, turmeric is widely used as a spice, colouring agent, and medicinal ingredient.

Red Chilli Powder

Available in different heat levels (mild, medium, hot). Perfect for curries, sauces, and seasoning.

Green Cardamom

Premium quality cardamom with strong aroma and flavor, used in desserts, tea, and spice blends.

Black Pepper

Known as the "King of Spices," black pepper adds sharp heat and is widely used in cuisines and medicines.

Cloves

Strong aromatic spice used in cooking, beverages, and traditional remedies.

Agricultural Products

Vermicomposting (Natural Organic Fertilizer)

Eco-friendly, nutrient-rich compost made from earthworms. Improves soil fertility, promotes plant growth, and supports organic farming.

Rock Phosphate

A natural source of phosphorus for agriculture. Improves root development and crop yield.

Gummies

Nutraceutical & Custom Gummies

We supply all types of gummies tailored to client requirements – vitamins, herbal extracts, functional supplements, and natural fruit-based gummies.

- Available in different shapes, flavours, and packaging.
- Private labelling & bulk orders accepted.
